

Money is the material value of the effort, every day practice billions of people work or effort, this equals money. That is every day goes on, money gathering and accumulates in banks by **financial system**. Who owns these banks, we see that they own also the **media** and control the **political decision** in most countries of the world.

A small group, because it operates with a comprehensive **system**, has managed to occupy the **society's nucleus** socially, and exploit and employ its people. Using the same **methods** and **tools** to achieve this in various countries of the world. This is done because the **individuals** that make up these communities do not belong to a **SYSTEM**.

And because these peoples are oblivious, they form the **base** of this wrong system, which they feed it. Although, this system exploits these peoples and contradicts them by its **decisions**.

At least you spend every day ten Euros or Dollars in a bar, restaurant or supermarket..etc. This money collects and accumulates in banks. So the **source** of this money is you as an **individual** and the total individuals as well. That is, the society you live in.

Because you live in your **individuality**, you think that the ten dollars in your pocket have no **value**. But with the rest of American peoples, for example:

10 dollar x 300 million individuals = 3 billion dollars a day.

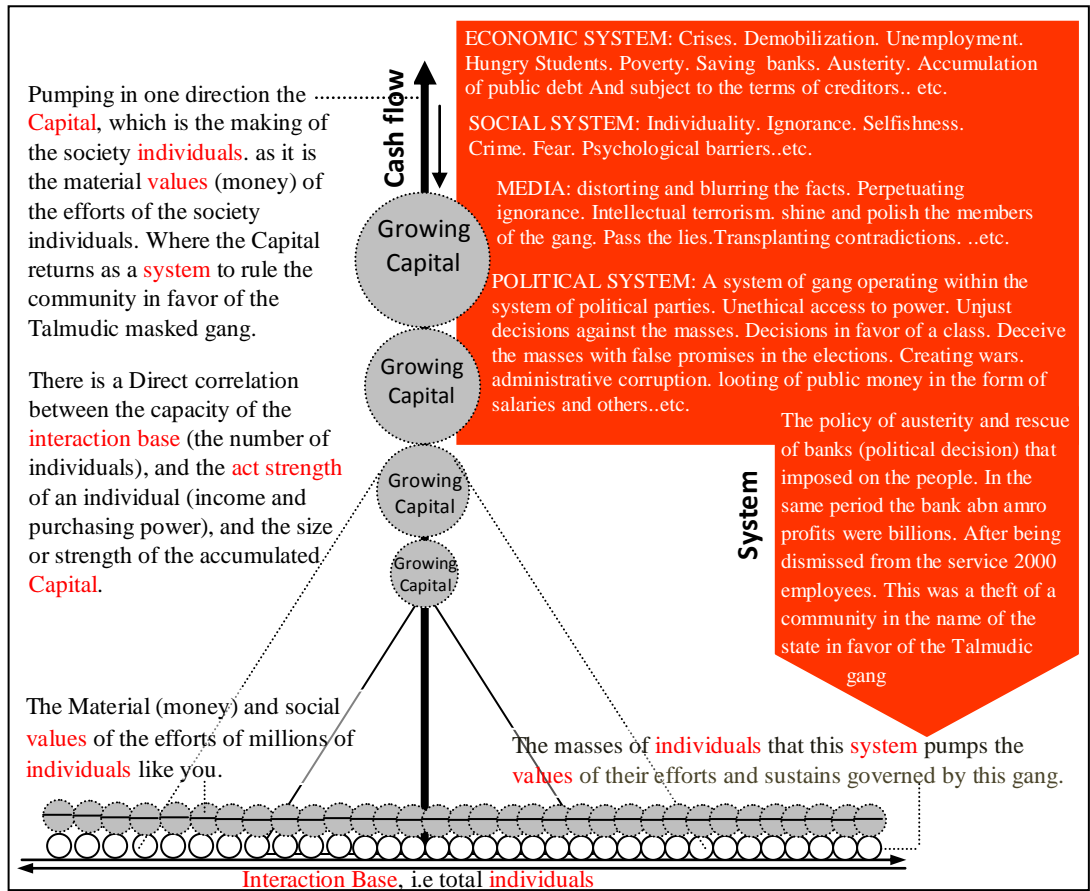

Then, you are the one who **feeds** this **system** by your individuality. Which send you by **political decision** to another side of earth to kill person who does not know you and did not fight you in fabricated wars, to return dead or distorted body. This **gang system** also imposes **taxes** on you, in order to support Israel, and to save their banks in fabricated crises or high salaries, benefits and allowances for the members of this gang, that control the society nucleus, even though they are a small minority in the society.

You also elect only and do not participate in the **political parties** and you leave your place for them and therefore they have open way without obstacles to reach the **leaderships** of the parties, i.e. the **political decision**. We must remember that the Balfour Declaration, the imposition of taxes, save the banks and the invasion of Iraq in favor of Israel..etc, are **political decisions**.

In Netherland, for example, only 2% of the Dutch people participate in political parties. And who elect party leaders are only 8-12% of the **party members**, i.e. only the party members who are present at **election sessions** of the leaderships. I.e. 8-12% of 2% of the Dutch people **controlling** millions of individuals and their existence and destinies.

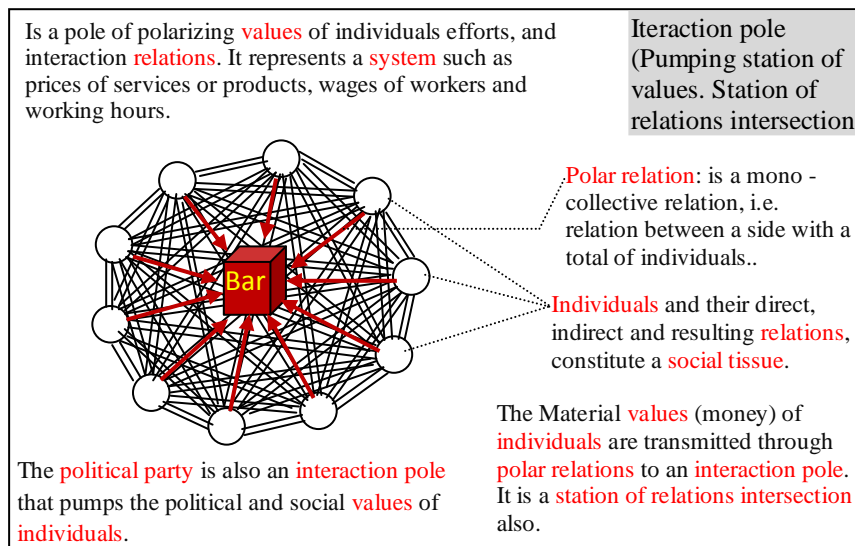

All this happens due to the absence of the alternative SYSTEM. You as individual, exhausted in the state of money or deep state or the state of the masked Talmudic gang. Which devoured the civil state and its institutions, and imposed upon it crises, wars and debts, and manipulated its constitution, media and dominated its political decision. You as an individual realize that you have to own capital, to achieve any economic activity, including the establishment of a newspaper, for example. And also you realize that you have to own capital even in charitable work such as helping the homeless or orphans ... etc.

But you still do not realize enough the seriousness of your role as an individual in sustaining this money state. This money state, for example, has owned and managed the media by the capital that is your making with the rest of society individuals. In this schema, the **capital** which is your making with the rest of society individuals, and its fundamental role in all community **activities** and **state policies**.

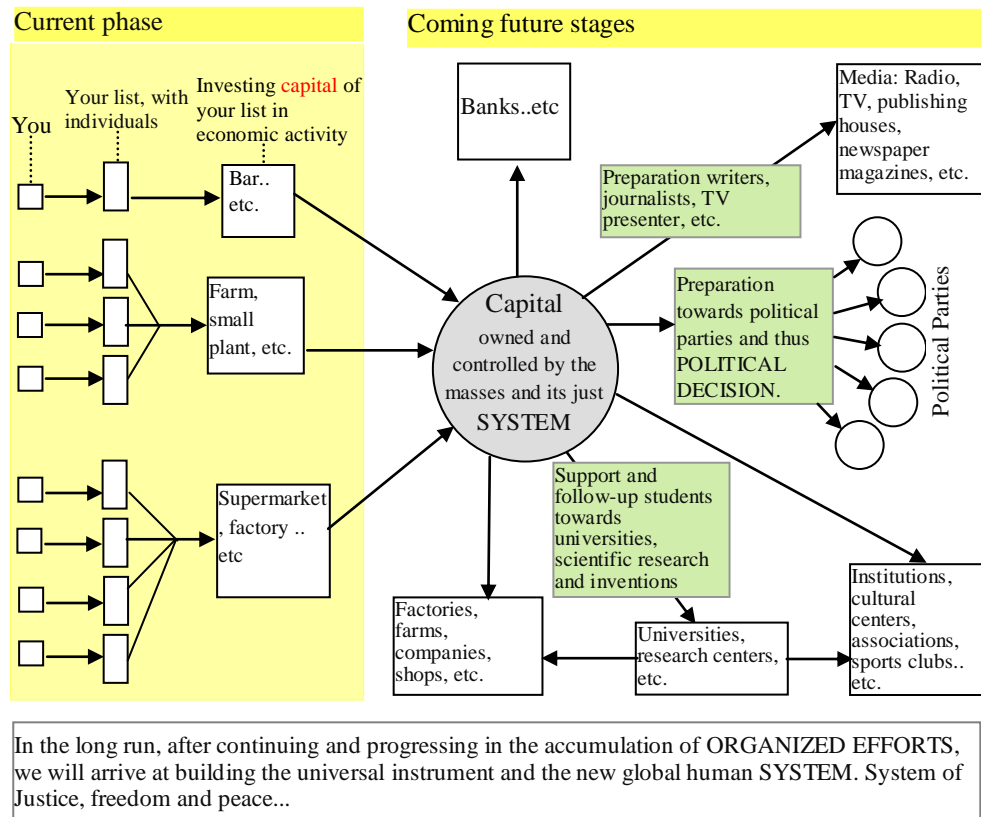

A false existence system that you and others make without attention to exercise in you negatively.

Therefore, the **capital** is the basic **base** of each organized activity. And it is the first step in building a **SYSTEM**. Let us understand here a small economic activity such as a bar or café (**Interaction pole**) in a **social interaction (social tissue)**.

Let us start by building a simple **interaction pole**, but it will be active in the **social tissue**, up to the **society nucleus**. That is, access to a growing and influential dynamic **capital**, and active role in the **media** and **political decision**.

PALESTINE CAFÉ:

- 1- Each of us shares a share or several shares according to his/her ability to buy the property that will be Café Palestine.
- 2- The café will be open to all people and will also be a cultural center and center of studies.
- 3- Buying a property is important so that we do not pay rent and reduce **operating costs**, which is at the same time the starting point of the new SYSTEM. The system of owning the masses their tools and controlling towards achieving the values of existence and the first is the justice.
- 4- Property ownership shall be registered in the name of all participants according to the number of their shares.
- 5- No individual is entitled to participate in more than 10% of the total capital of the project, to combat penetration, monopoly and dominance on individuals decisions.
- 6- Any person anywhere in the world is entitled to participate in a project in another country.

7- A committee is established to record the names of participants and the number of shares. The number of members of the Committee shall not be less than five persons, to fight infiltration, manipulation and sabotage.

8- The Committee is obliged to act as a single group and no member of the Committee is entitled to make decisions alone, or do not inform other members of the Committee of developments.

9- The Committee is obliged to inform all participating individuals of all developments, both in respect of capital realized and other developments.

10- Decisions shall be made by a majority vote of the participating members after the participation in the study of any step taken.

11- The person who withdraws from the project has the right to recover the value of the shares in which he participated. And has no right in profits. So that we do not get into accounting and legal problems because profits and losses are variable.

Café activities:

1- In addition to the café's functions in offering food and drink especially Palestinian. There will be a pavilion to sell the Palestinian Kufiya, books, posters, postcards, printed cards, symbols of Palestine, costumes, music, Palestinian songs, Palestinian handicrafts, and other products such as olive oil, dates..etc.

2- Organizing lectures, seminars and meetings in politics, economy, religion, history, media.. etc, and hosting professors and specialists in these fields.

3- Exhibitions of fine arts like painting, sculpture and other arts .. etc.

4- Peoples 'Fashion: People' s Fashion Shows. Sewing workshops..etc.

5- Peoples music: Peoples music concerts. Courses of learning to play musical instruments ... etc.

6- People's dishes: tables of people's dishes.

7- People's Literature : poetry, Tales and parables..etc.

8- People 's Movies. Documentary films about peoples, customs, traditions, geography and history..etc.

9- Children's education courses: drawing. Languages. Children's parties. Weddings or graduation .. etc.

10- The Café as a research center also prepares articles and studies and push them to newspapers. As well as documentary films about Palestine and push them to the media. also translates books on the Palestinian issue into multiple languages.

And so on of other activities.

So, we need a big property to achieve these activities and it is also located in the heart of the city to connect with all the city's tourists from all over the world.

This means that we have to start with **capital** that meets these requirements.

Example:

1000 individuals, each of whom participate with 100 shares (the value of the share is ten Dollars or ten Euros). That is equal to one million Dollars or Euros.

2000 individuals each of whom shares 50 shares equal to one million Dollars or Euros.

200 individuals, each of whom shares 500 shares, equal to one million Dollars or Euros.

200 individuals, each of whom shares 1,000 shares, equal to 2 million Dollars or Euros.

10,000 individuals, each of whom shares 10 shares, equal to 1 million Dollars or Euros.

That is to say, the realization of the **capital** required, depends on two elements:

A- **Interaction Base**: Whenever greater the base of interaction (number of participants in this project), whenever greater capital is achieved.

B- **Act Power**: I.e, whenever the individuals participate with more shares, whenever greater capital is achieved.

When we achieve the SYSTEM of operation and management of this project, and after overcoming the disadvantages. We will work to establish such a cafe in all countries of the world, but in all cities of the world.

We will work on the second step, where we will enter into projects such as supermarkets where job opportunities for students and unemployed are also achieved as well as publishing house. In which books are translated into and from multiple languages, to combat the mainstream media dominated by the Talmudic gang.

As well as starting to establish a newspaper and magazine will be initially digitized, and then will be paper. After that, after the realization of the SYSTEM and the growth of CAPITAL, we will enter the world of television to be for us a television station, to convey the facts to all people. With these projects we will achieve jobs opportunities. And we will create and develop writers, correspondents, media professionals and politicians and preparing them to participate in political parties and thus POLITICAL DECISION.

In the long run, after the building of the SYSTEM is completed, we will establish a **political party** and clone it around the world to achieve a just human system. And the abolition of the system of the masked Talmudic gang around the world, and the exploitation, looting, contradictions, crises and wars it creates, to perpetuate its hegemony over the world.

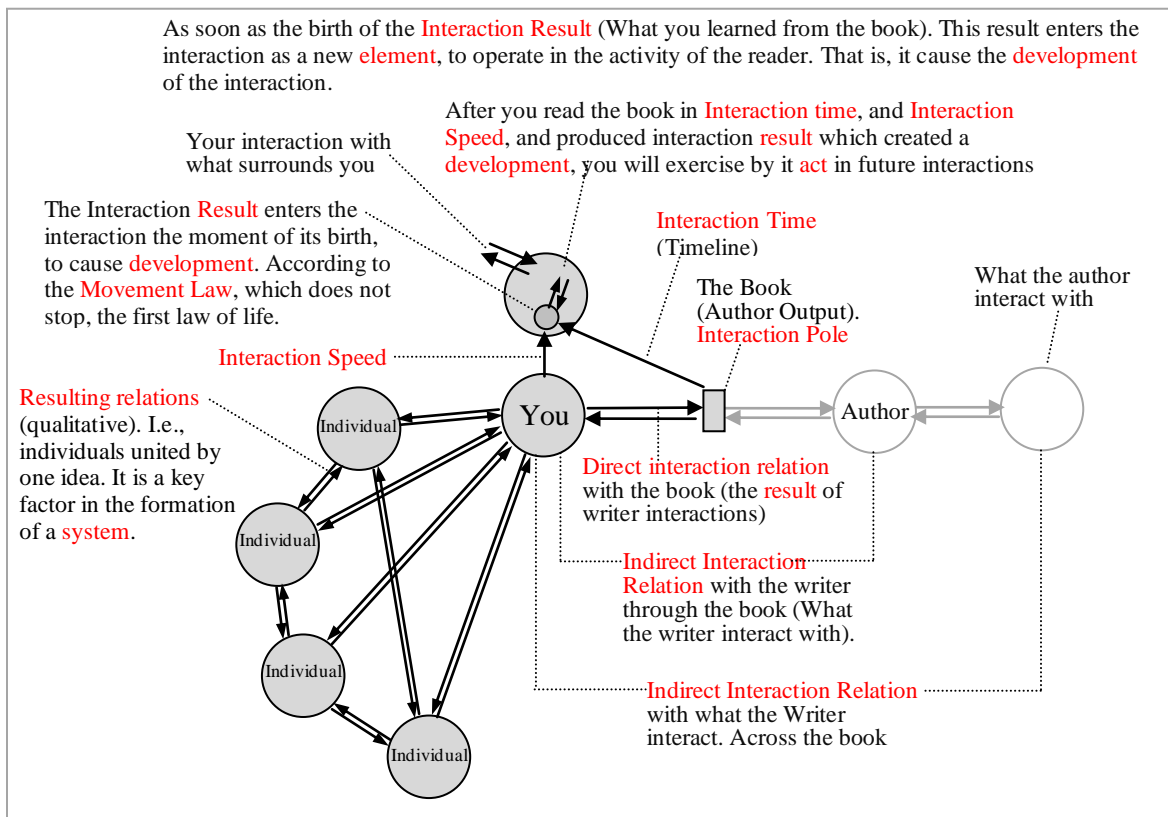

Traditional political parties around the world are socio-political. As for the political party that we will achieve, will be a socio-political-economic party, to guide the economy fairly, with no manipulation of the money, media and political decision of the Talmudic gang.

The rule is the fair distribution of **efforts** as well as **wages**. That is, JUSTICE the supreme value of the existence is the **ruler** and we are the justice tools.

Of course, any realization of an idea on the reality ground needs cumulative work and time. At first some may not respond to you, and you should always continue to accumulate your organized efforts. Do not think by the culture of fear of cons. Cons occur in every action or activity. Think by the culture of **analysis** and **discovering** the causes of cons and finding **solutions**.

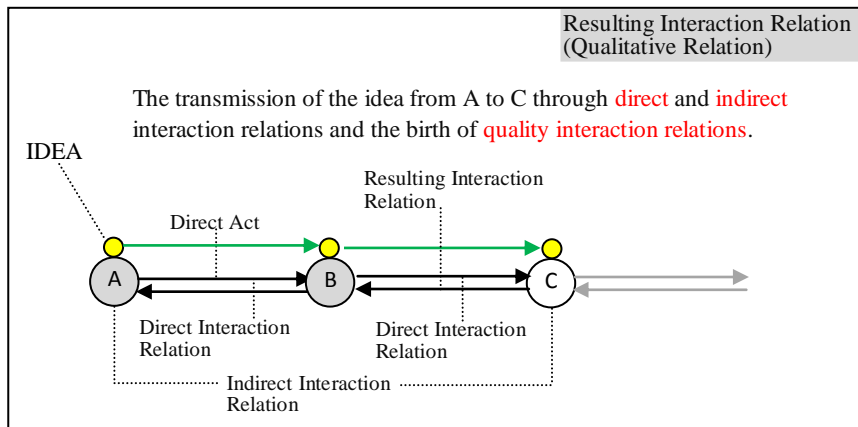

Whenever the principles and rules of the work (system) include the most detailed details, whenever the building of the SYSTEM, progresses with less cons. You need the time of delivery of the idea + the time of the interaction of the receiver with the idea and its recognition and acceptance (**Interaction Time**):

Interaction Time (timeline): is the time it takes the process of an interaction, to be done its **result**. For example, reading a book. I.e., entering into **indirect interaction** with the author, with **indirect interaction relation** across the book. And also **indirectly interact** with what the writer has interacted with. It is an **Interaction Time**. Your conclusion and what you learned from the book, is **Interaction Result**.

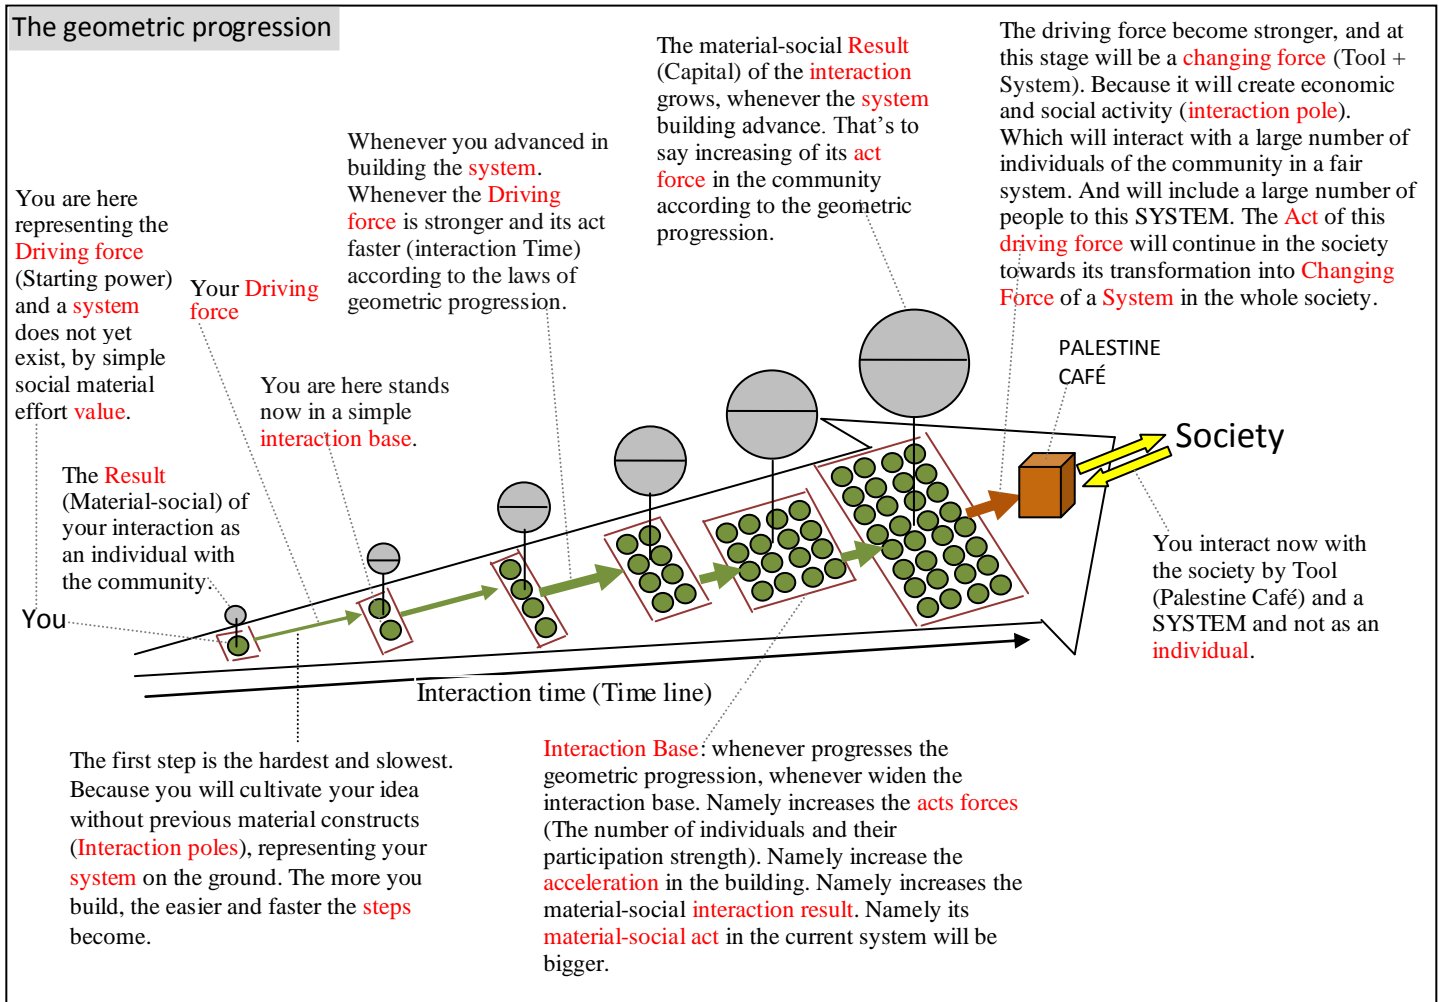

Of course, joining individuals to this project depends on your ability to convey the idea sufficiently to fit in with the recipient's culture, awareness, experiences of life and what he aspires to. Till you build up a qualitative relation with him (Interaction Result). Of course there is a difference in the degree of awareness and culture among those who you will move on them.

So you have to contact each of them accordingly. In this simple scheme, we see how the qualitative relation is generated even with individuals who do not have a direct relation with them. You should always be aware that we do NOT want to be the masked Jews among us.

The geometric progression: the process of acceleration of the number, performance and power in the **Interaction Time** (time-line).
